CASE STUDY: *FULLY CUSTOMIZABLE DATABASE*

THE CHALLENGES

The client, a construction software solutions company, needed a third-party to test their existing system. They knew they had built plenty of security and defenses and needed someone to validate their testing.

THE SOLUTION

In Time Tec essentially hacked their application in an effort to try to break or compromise it and share vulnerabilities with the client. We were able to bypass a lot of their existing defenses and showed them gaps for exploitations. We provided the client with a report of the vulnerabilities, showing which part of the code was vulnerable, and suggested solutions.

THE RESULTS :

MORE SECURITY:
Found gaps where the application could be more secure Validated what was working; Proved that some of what they had done worked as it was supposed to.
